Hello Michelle,
It was nice to see you again and I was pleased to see EPA represented at the AWISC conference.

Regarding my copper presentation, the movie I showed is from NOAA and is available at this link:

<http://www.nwfsc.noaa.gov/research/divisions/ec/ecotox/fishneurobiology/copperimpacts.cfm>

Much of my presentation was based on a literature review and synthesis I prepared last year for Native interests and non-profits. I am also attaching other recent relevant literature for you to share with your colleagues.

I am updating my website and will soon post the copper presentation you request. The University also has it and will upload it soon.

I appreciate your communication and attention to questions raised regarding the new science, outdated regulations, and the implications for salmon should we rely on current standards alone, especially in the face of Pebble.

Sincerely,

Carol Ann Woody, PhD

Good morning;

It was nice to see you again. I would like to ask for a copy of your copper presentation to send to some of my co-workers within EPA. I hope the campus will post presentations on the web, but I'd like to also send out materials with my detailed trip report. You raised concerns that I want to be sure that the EPA team is has an opportunity to consider. Please feel free to call if you have any questions or concerns. Thanks for considering this request.
